Section 1: Manual Control

A. Procedures for revising West Star Aviation Capability list.

1. The Accountable Manager will be responsible for making and submitting revisions.
2. The Capability List will be kept in electronic format accessible on West Star Aviation (WSA) computer network. An up-to-date electronic version will also be available on West Star Aviation's Shared Network File computer system, which is available for employee use and reference. The revised list and any other necessary technical data will be submitted via email within 5 business days of revising to West Star Aviation's Principal Inspector at the Nashville Flight Standards District Office.
3. Revised material will be indicated by revision bars on the side margins. All revisions will be dated using the revision approval date by the Accountable Manager. The table of contents and list of effected pages will also be updated to reflect the revision.
4. The cover page of the manual will be approved and signed by the Accountable Manager.
5. The Nashville Flight Standards District Office will receive a copy of the Capabilities List showing revision(s) in an electronic format, and will be sent to the assigned Principal Inspector (PI) for the acceptance.

B. Procedures for self-evaluation and reporting the results of the self-evaluations for the capability list 145.215(c)

1. Self-evaluation will be performed when another aircraft, engine, or article needs to be added or removed.
2. An example of the Self Evaluation Form WSA-F100 can be found in section 3 of this manual.
3. The Accountable Manager will perform the self-evaluations and must have the following qualifications:
    a. Experience with performing evaluations.
    b. An understanding of the requirements of Part 145.
    c. Knowledge of the maintenance requirements for the particular make/model of article to be added to the list.
4. Each article in the list must have a self-evaluation form WSA-F100 completed by the Accountable Manager.
5. This form must be completely filled out, signed and available for review to the Nashville Flight Standards District Office.
6. The self evaluation forms WSA-F100 will be kept in an electronic version available on West Star Aviation's Shared Network File computer system.

Section 1: Manual Control (Continued)

C. Procedures for reporting deficiencies found.

1. WSA-F026 Nonconformance write-up and corrective action form will be filled out to report any deficiencies found during the self-evaluation. This form will be used to report to the Accountable Manager for review and resolution.
2. The nonconformance forms will be kept in an electronic version available on West Star Aviation's Shared Network File computer system. West Star Aviation will keep records of the self-evaluation on file for a period of 2 years.

D. Procedures for completing the Self Evaluation Form WSA-F100 (on page 15 of this manual)

1. Enter Accountable Manager's name and date.

2. List the Manufacturer, make and/or model of the aircraft, engine, or article that is being evaluated.

3. Answer all of the 10 questions accurately and add comments if necessary.

4. Any additional Comments may be added on the last 3 lines.
